

OPEN PLAN AT THE HEART

The heart of this newly villa designed, built and interior designed by TG Studio is the 15 metre open-plan living dining and kitchen with nine metre wide triple sliding doors that removes the barrier between inside and outside living. All but one of the five spacious ensuite bedrooms were intentionally located on the ground floor and all face the stunning Tramuntana Mountains. The villa is one of several designed and built by TG Studio in the Balearics.

Sol de Majorca, a five bed detached villa with a pool, was designed by Thomas Griem, TG Studio, and completed in April 2019. Photography by Phillip Vile.
