

## FOREWORD

Architecture is mutually the process and the product of planning, designing, and constructing buildings or other structures with the aim to ultimately improve human life, by creating timeless, free, joyous spaces for all life's activities. Interior Design is the art of enhancing the interior of a building to achieve a healthier and a more aesthetically pleasing environment for the people using the space. It is the seamless enjoyment of both that ultimately achieves a perfect unison.

Thomas trained in London at the University of Westminster and at the Architectural Association. He has also made furniture, lights and has always been fascinated by the making, designing and creating of not only buildings or interior spaces, but products.

His work as an architect has been diverse, however he found that his passion lay in designing timeless beautiful homes. It has always been exceptionally important for Thomas to genuinely respond to the particular requirements of the client, the site and significantly the budget.

Thomas opened TG Studio in 2011 and his portfolio of works is a testament to the success of the studio's creativity and approach to architecture and interior design.

Liliana Griem is an architect  
and partner at TG STUDIO

## PREFACE

This book is about my studio's projects over the last decade and contains a selection of some of the work.

I grew up in the south of Germany, in a small town surrounded by rolling forest and vineyards. In childhood, I spent time drawing and making things and knew that after leaving school I wanted to pursue a creative career. I moved to London to study architecture at the University of Westminster and decided to stay. I now call London home.

In 2011 I opened my studio where I have been fortunate to design homes in some of London's leading residential locations and internationally. This has meant quite a few historical refurbishments and conversions as well as new built homes, all with the purpose to create a modern home.

Consequently, I have grown into an architect specialised in interior architecture and delivering exceptionally bespoke homes. I have also become a great admirer of photographic art, it is that photograph that captures the moment of the composition. The composition of beauty and perfection.

Each project featured within this book is as unique as the individual client behind the project and as diverse as its location and setting.

Thomas Griem

## LLUCMAJOR

MALLORCA, SPAIN

On the cliffs of the bay of Palma lies this timeless and serene new home. Perfectly fusing modern architecture with age old building techniques and hand craftsmanship using raw local stone and natural materials.

Recto linear in its floor plate, with a central spine linking all rooms and living spaces, this beautiful home offers all its vistas towards the deep blue Mediterranean sea.

An oasis of calm and deep sunsets with meandering olives groves and an array of gentle rolling oleanders.

Local architect - CMV.

Garden design - Stephen Woodham.
